

Need to Know

Rhapsody now registered for powdery mildew and botrytis on all ornamentals

Rhapsody is equipped with a combination of antifungal and antibacterial compounds produced by the naturally occurring, patented strain of *Bacillus subtilis* (QST 713). These compounds utilize multiple modes of action to kill pathogens, making Rhapsody an effective resistance management tool for growers.

Now registered for treatment on all greenhouse and outdoor ornamentals for powdery mildew and botrytis, Rhapsody is a valuable asset for all your greenhouse plants.

Rhapsody's unique strain of *Bacillus subtilis* is proprietary to Bayer, and highly active against problematic greenhouse diseases. It is optimally formulated for disease efficacy in an aqueous suspension (liquid) which allows for easy handling and storage.

Rhapsody is the only bio-fungicide that is Backed by Bayer; meaning it comes with an extensive collection of University-based research and technical support that ensures product efficacy under a wide range of conditions.

Disease	Crop	Rate (litres/100 litres of water)	Application Instructions
Powdery mildew (<i>Oidium spp.</i> , <i>Erysiphe spp.</i> , <i>Sphaerotheca spp.</i>)	Ornamentals	1.0 – 2.0	Apply on a 7 day schedule. Under high disease pressure, use higher rate or in a rotational program with other registered fungicides. Thorough coverage of plants is essential for effective disease control.
Botrytis blight (<i>Botrytis cinerea</i>)	Ornamentals	1.0 – 2.0	
Leaf spot (<i>Xanthomonas spp.</i>) (<i>Xanthomonas campestris pv. pelargonii</i>)	Geranium Aglaonema	1.0 – 2.0	
Leaf spot (<i>Pseudomonas delphinii</i>)	Delphinium	1.0	
Anthraco nose (<i>Colletrichum acutatum</i>)	Leatherleaf fern	1.0 – 2.0	
Black spot (<i>Marssonina rosae</i>)	Roses	1.0 – 2.0
